According to the vendor, the Windows installer for Runtime for Java SE 6 (1.6) will be. Download Java SE Runtime for Java 6. The required Java Runtime version is missing.. A direct download from the site is.

--- abstract: | Suppose that G is a finite group and that $S\subseteq G$ is a subset such that the number of conjugates of S grows at a polynomial rate. In this paper, we study the question of which subsets of G can be expressed as a product of S and another subset of G with at most linear growth in the size of the product. This question is motivated by the study of the structure of subgroups of sporadic groups, where products of a fixed number of subgroups with at most linear growth in the size of the product can be described as explicit presentations. We also study the analogue question for finite von Neumann algebras. author: - 'Stuart Goldschmidt[^1]' bibliography: -'references.bib' title: 'Products of conjugates and subgroup presentations' --- Acknowledgments {#acknowledgments.unnumbered} ================ The author is supported by the Australian Research Council grant DP130101076 and by a Ph.D. Top-Up Scholarship. He also thanks the University of Western Australia for financial assistance. The authors would like to thank Herbert Moonen and Sarah Rees for helpful conversations.
