Bergman Incropera. Q: Is it possible to supply the value of an HTML5 input type submit via URL parameter? I have an application that is making use of a web server to do some server-side processing. The code I have written works just fine to submit a form using the submit button. I want to use a URL parameter for a change; that is, I want to tell the server that if you hit the URL, pass in parameter 10. I have three questions - Is this possible? How to get the value from URL? If it is possible, is it possible to store the value in a session? A:
